

# Statement Options

† Modified on 10/10/2025 10:27 am EDT

The **Edit Settings** button allows you to enable, disable or edit settings to different types of statements.

1. Select **Customer Setup > Statements**.
2. Use the **Practice to Manage Statement Configuration for** drop-down menu to select the desired practice.

 If you have multiple practices, these settings must be configured under each participating practice.

3. Under the **Automation Statement Generation** table, click the **Edit Settings** button.
4. Use the **checkbox(es)** to **enable** or **disable** the **types of statements** you would like to use.
5. Configure the settings associated with Statements.

 When enabling Statement automation, statements will not be sent until a template has been configured. Please reference our [Edit Statement Automation Templates Help Article](#) for more information.

1. **Send statements electronically?** Set this option to **Yes** if you want to send electronic statements (email or text) to patients.
2. **Send statements on paper after the maximum number of electronic statements have been sent?** Set this option to **Yes**, and choose the number of days you want to send the paper statement after the maximum number of electronic statements is sent.
3. **Statement Options:**
  1. **Minimum amount required for sending Statements and FDNs** For example, enter "\$5.00" if you wish to have patients with a balance greater than or equal to \$5.00 receive a statement
  2. **Wait to send statements until ( ) days since the patient's last visit** Check the box to set this option and choose the number of days (between 1-99) you want to send a statement after the patient's last visit.

 Inpatient visits can span days or weeks and often include multiple claims. Select the **"Wait to send statements until ( ) days since the patient's last visit"** option to delay sending statements until the patient has been discharged, preventing multiple

statements from being sent.

3. **Prevent statements from being sent to patients with any outstanding account credit(s) set to due insurance?** Set this option to **Yes** if you do not want to send statements to patients that have account credits set to "Due Insurance."

#### 4. Electronic Statements:

1. **Choose allowed methods to send electronic statements** Select how the electronic statements should be sent, Email Only or Email and Text (email will be the first option).
2. **Send Email Replies to:** Select where you want email replies to be sent to.
3. **Choose when to send electronic statements** Select the day of the week and the time of the day to send out the electronic statements and how long to wait between statements.

 **Our recommended settings** were created from research that indicates that response rates are the highest in the late morning or mid-afternoon on Tuesdays and Fridays.

4. **Number of electronic statements to send unless statement balance paid in full** Enter the number of times a statement should be sent if unpaid.

 Set this field to '0' to continue sending statements until the patient pays the full balance.

#### 5. Paper Statements:

1. **Frequency for sending paper statements and FDNs:** Select the number of days to send a paper statement after any applicable electronic statements have been sent.
2. **Statement Separation:** Select how statements should be separated.
  1. **Send one statement for all charges** Select this option to send a combined statement for all charges on the account.
  2. **Send separate statements for charges per provider.** Select this option to send separate statements for charges associated with different **Providers**.
  3. **Send separate statements for charges per practice.** Select this option to send separate statements for charges associated with different **Practice**.
  4. **Send separate statements for charges per claim.** Select this option to send separate statements for charges separated by **Claim**.

 Selecting the option to "Send separate statements for charges per claim" will include any account debits (debits not attached to a claim) as their own statement.

3. **Number of paper statements to send unless statement balance paid in full** Enter the number of times a paper statement should be sent if unpaid.

 Set this field to '0' to continue sending statements until the patient pays the full balance.

6. **Select the Patient Account Types to send Statements to** Select All Account Types or identify specific patient account types (eg., Self Pay, Payment Plan, Collection) that should receive a statement.

6. Click **Save**.

**Important:**

- Modifying the date or number of days for a statement will cause **ALL** charges that are set to "Balance Due Patient" to be printed and mailed again. CollaborateMD is not responsible for duplicate statements in the event the date is modified.
  - Enabling both paper statements and electronic statements will result in a paper statement being sent immediately to the patient in the event that an electronic statement cannot be sent or if the maximum number of electronic statements have been sent out.
-
