

Release 15.5.0 - March 17, 2025

Modified on 03/13/2025 1:24 pm EDT

New Features and Updates

General

Appointments

- **New Enhanced Auditing (Show History) for Appointments** CollaborateMD has been working on a new enhanced auditing project that will provide offices with an easy and transparent way of auditing changes made in the application. We previously released our new Enhanced User Auditing feature in the Customer Setup, Patient, and Claim sections of the application, allowing users to see a detailed list of changes made to specific records throughout the application.

In this release, we are expanding our Enhanced Auditing functionality to the Appointments section, enabling users to track modifications, changes, and updates made to appointments within CMD for better auditing and accountability. With the new "Show History" feature, you can now determine which user changed/updated specific appointment information in the software and when by providing an auditing table with all updates or changes made to a record, including the user, date and time, and the record changed.

The screenshot displays the 'Appointment' form in the CollaborateMD application. The interface includes a top navigation bar with buttons for 'Save', 'Cancel', 'Save & Send Forms', 'Print', 'Eligibility', 'Activity', 'View All Appointments', and 'Show History' (highlighted with a red box). Below the navigation bar, there are tabs for 'Appointment', 'Patient', and 'Payment'. The main form area is divided into sections: 'Patient' (with patient name TEST, JOHNNY (33397993)), 'Appointment Date' (03/13/2025), 'Time' (01:00 PM), and 'Length' (45 Minutes). There are also fields for 'Appt Status' (Scheduled), 'Appt Type' (CARDIOLOGY), 'Resource' ([01] JESSICA DUKE), and 'Facility' (A UNIQUE FACILITY(#10203231)). A 'Chief Complaint' field and a 'Repeat appointment every' dropdown are also visible. On the right side, there is an 'Account Summary for JOHNNY TEST' section with various financial and administrative details.

These new auditing records are also included in our existing User Audit Report, making it an even stronger tool for auditing multiple records simultaneously. The Show History capability has currently been deployed in the Customer Setup, Patient, Claim, and Appointments sections, and we will be systematically adding it to other sections of the application.

For more information on using our new Add New Same/Similar Code List feature, please visit our [Enhanced Auditing Help Articles](#).
