

Eligibility Benefit Data

Modified on 07/17/2026 2:11 pm EDT

Eligibility Data contains response details that integrate with your existing eligibility data reports. Because payers provide information in varying formats and the range of benefit details is extensive, this data can be customized (via a custom report) to meet your specific needs. All of the fields within this category correspond directly to fields that can be found in the Eligibility Response screen.

Name	Description
Benefit Type	Displays benefit category (e.g., copay, deductible, out-of-pocket max), covering roughly 35 standard benefit types returned by payers.
Benefit Value	Allows you to drill into a specific service type within that benefit (e.g., <i>Health Benefit Plan Coverage</i>), with roughly 150 possible values to choose from. You must select your benefit value from the list when adding as a column or filter.
Benefit Index	Displays the benefit index for premiums and out-of-pocket medical costs.
Transaction ID	The unique identifier for the eligibility transaction.
